

PerfectClean

Coating PI 0200 Wash Up

PerfectClean Coating PI 0200 is an effective cleaning solution for removing waterbased coating emulsions.

Application: Soak articles to be cleaned in the solution for 20 – 30 mins and afterwards rinse with clean water. Very hard dried or thick coating build up may require overnight soaking to soften the material fully.

Use: Use to remove waterbased coating emulsions as well as dried coating from the coating equipment. When diluted it can be used for flushing pipes and pumps to prepare the machine for the next run. The product can be used purely or in a mixture 1 : 4 with tap water.

Typical constants:	Viscosity	NA	
	Specific gravity	1.00 g/cm	± 0.04
	Apearance	Transparent liquid	
	Solids	NA	
	pH	9.5	

Storage conditions: Store at temperatures above 5°C and in closed packaging

Shelf life: In unopened, original packaging, 5 years from manufacturing date

The information provided in this technical data sheet is to inform our customers. A successful application depends on a variety of different factors. Therefore the advice given in this technical data sheet cannot be used as basis for claims. Our recommendation is where possible to perform tests before entering production runs. We reserve the rights to change product characteristics because of technical progress, amendment of applicable law and mandatory production related needs.
